Forest Care Program Thinning		TOTAL
ITEM	DESCRIPTION	TOTAL
1. Tree Removal	<input type="checkbox"/> Removal of specified trees 12" DBH and less. <input type="checkbox"/> Stumps cut to 8" height or less. <input type="checkbox"/> Stumps cut as close to the ground as practical. <input type="checkbox"/> Stumps cut to prevent a sharp point from being left. <input type="checkbox"/> All stumps greater than 6" diameter treated within 6 hour of cutting with a registered borate compound to prevent Anosus Root Disease.	
2. Pruning	<input type="checkbox"/> Pruned all residual trees up to 8 foot height, but no more than half the tree's height. <input type="checkbox"/> Pruned brush to eliminate ladder fuel effect. Minimum clearance generally being 3 times the height of the understory vegetation.	
3. Slash	<input type="checkbox"/> All Forest Care project slashed removed off site, or <input type="checkbox"/> Chipped on site, but to a depth no greater than 2 inches in any single location. <input type="checkbox"/> Chips raked back to a minimum of 3 feet from the bole of any tree.
